## Cavite: A Brief Analysis

Cavite is situated at the entrance of Manila Bay, across which lies the province of Bataan. Its boundaries are defined by the National Capital Region (Metropolitan Manila) and Laguna on the northeast, Batangas on the southwest, the China Sea on the west, and the Manila Bay on the northwest.

The provincial terrain consists mainly of rolling hinterlands interspersed with low mountains. The only rugged portion of the province is found along the Maragondon border between Cavite and Batangas where the Dos Picos Mountains are located. The province covers a land area of 1,287.6 square kilometers, representing 0.4 percent of the total land area of the country.

Cavite has 19 municipalities and 3 cities: Tagaytay City, the province's tourist spot, Cavite City and Trece Martires City. In the 1975 census, Trece Martires City was the provincial capital. By virtue of P.D. No. 1170 dated July 11, 1977, however, the seat of government was transferred to Imus.

#### **POPULATION**

As recorded in the 1980 census, Cavite's population was 771,320 of which 384,030 were males and 387,290, females. The province had a population density of 599.0 persons per square kilometer, reflecting an increase of 111.0 persons per square kilometer over a span of five years or of 195.0 persons in 10 years. Ranking number 21 in population size in 1975, Cavite now ranks nineteenth among the 73 provinces of the country. The province registered an average annual geometric growth rate of 4.19 percent between 1975 and 1980, higher by 1.48 percentage points than the national growth rate. One of the top 15 provinces with high growth rates, Cavite tied with Bataan for the twelfth place. If cities were excluded from the provinces being ranked, however, the former would move up to the sixth and the latter, to the eleventh. It was observed that between 1960-1970 the growth rate recorded for the province was 3.24 percent, increasing to 3.85 percent between 1970 and 1975.

Predominantly urban since 1970, the province has moved further towards urbanization. Almost sixty percent (59.79%) of the population are concentrated in the urban areas, while 40.21 percent reside in rural areas. Table A shows that the proportion of the rural population has steadily declined over the last three censal years — from 49.82 percent in 1970 to 45.49 percent in 1975, moving down to 40.21 percent in 1980.

Shown below is a comparative breakdown of the population classified according to urban-rural residence and sex in three censal years:

TABLE A - URBAN-RURAL POPULATION BY SEX, CAVITE: 1970, 1975 AND 1980

Area Classification	198	80	19	75	19	70
and Sex	Number	Percent	Number	Percent	Number	Percent
Total	771,320	100.00	628,321	100.00	520,180	100.00
Male	384,030	49.79	313,378	49.87	256,559	49.32
Female	387,290	50.21	314,943	50.13	263,621	50.68
Urban	461,187	59.79	342,484	54.51	261,030	50.18
Male	227,527	29.50	169,154	26.92	126,535	24.32
Female	233,660	30.29	173,330	27.59	134,495	25.86
Rural	310,133	40.21	285,837	45.49	259,150	49.82
Male	156,503	20.29	144,224	22.95	130,024	25.00
Female	153,630	19.92	141,613	22.54	129,126	24.82

The sex ratio (number of males for every 100 females) slightly decreased from 99.50 in 1975 to 99.16 in 1980. The focus of females predominating over males lies in the urban areas where there are only 97.38 males for every 100 females. However, the rural areas registered a higher sex ratio at 101.87. A similar pattern was observed in 1975 when the sex ratio was 97.59 for urban and 101.84 for rural areas.

#### AGE COMPOSITION

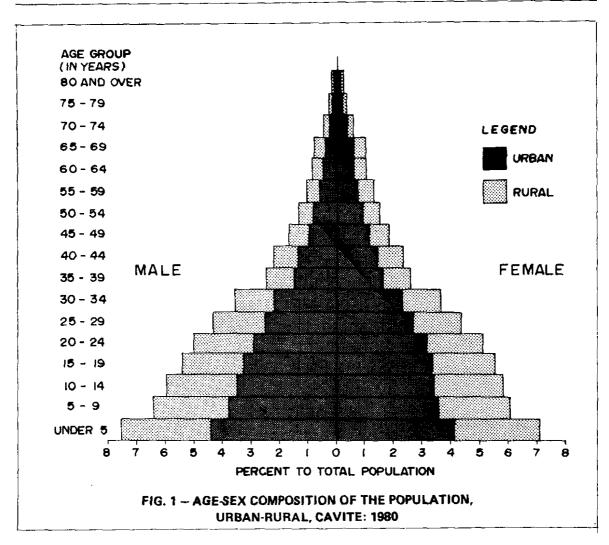

The age composition of the population tends to follow an expansive profile of an age-sex pyramid. A large proportion of the urban as well as the rural male and female population are under 5 years old (14.93 % and 13.64%, respectively, of the total urban population; 15.47% and 15.06% for their rural counterparts). From this age bracket to the 80 and above, the male and female population decrease respectively as each age group grows older.

As seen in the following table, the proportion of the younger age group (0-14 years) continued to drop in the last ten years, although the decline from 1970-1975 was far more substantial than that from 1975-1980. From 43.05 percent in 1970, its corresponding proportion slid down to 40.03 percent in 1975, dropping further to 38.95 percent in 1980. On the other hand, the productive age group (15-64 years) constitutes more than one-half (57.15%) of the provincial total, with an increase of 0.73 percentage point. The older age group (65 years and over) retains its upward trend, from 3.27 percent in 1970 to 3.55 percent in 1975 and 3.90 percent in 1980.

Below are comparative figures showing the age composition of the population in three censal years:

TABLE B – AGE COMPOSITION OF THE POPULATION, CAVITE: 1970, 1975 AND 1980

Age	198	30	197	75	19	70
Composition	Number	Percent	Number	Percent	Number	Percent
Total	771,320	100.00	628,321	100.00	520,180	100.00
0 – 14	300,399	38.95	251,533	40.03	223,961	43.05
15 – 64 years	440,814	57.15	354,507	56.42	279,219	53.68
65 years and over	30,107	3.90	22,281	3.55	17,000	3.27

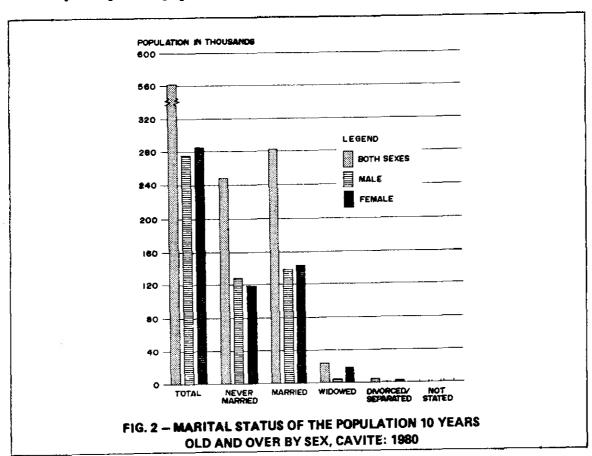

In 1970 the median age of the population was 17 years; in 1975 this had increased to 19 years and in 1980, to 20 years. Thus, within a period of 10 years, the median age grew by 3 years, indicating that the population in the province is gradually growing "older".

With an increased percentage of persons in the productive age group, the dependency ratio was much lower in 1980 than in 1975. From 77.24 in 1975, the dependency ratio moved down to 74.98 in 1980, after declining by 9.06 between 1970 and 1975. The preceding table on age distribution shows that 42.85 percent of the population belong to the "dependent" population (0-14 and 65 years and over). The dependency ratio in the urban areas (72.28%) is markedly lower than in the rural areas (79.15%). Out of 461,187 urban population, 38.15 percent are below 15 years old, 58.05 percent are in the productive age bracket and only 3.80 percent are 65 years and over. Among rural dwellers 40.12 percent are 0-14 years of age; 55.82 percent, 15-64 years and 4.06 percent, 65 years and over.

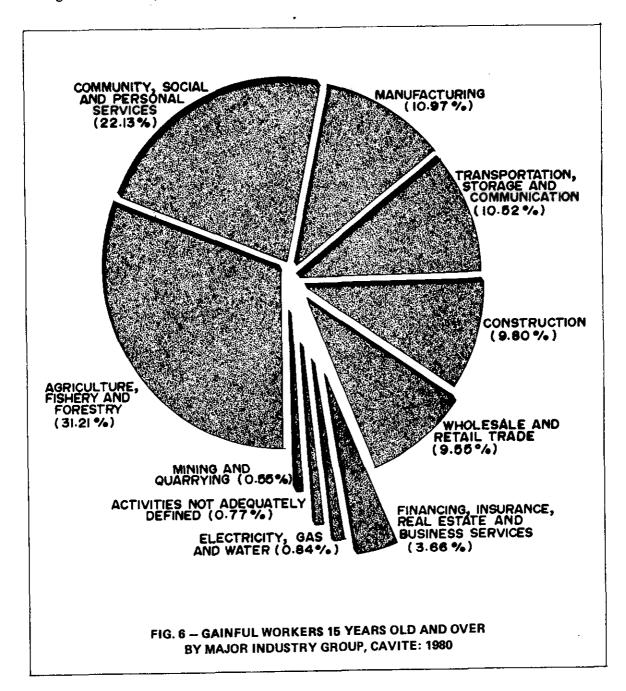

#### **MARITAL STATUS**

Never married individuals, which in previous censuses topped all the other marital status categories, unexpectedly decreased by 5.64 percentage points. Married persons, on the other hand, sustained an upward trend, from 45.84 in 1970 to 45.89 in 1975 and 50.41 percent in 1980. Widowed and divorced or separated persons grew by 0.65 and 0.44 percentage points, respectively. Similarly, those with unknown marital status slightly increased by 0.03 percentage point.

#### **INDUSTRY**

Around 31.21 percent of the total gainful workers 15 years old and over derive their sustenance from agriculture, fishery and forestry, the leading industry group in Cavite. Approximately 82.45 percent of the agricultural workers get their income from agricultural crop production and 14.80 percent, from fishery. Community, social and personal services rank second with 22.13 percent. The three main sources of employment this industry group provides are personal and household services (35.26%), public administration and defense (27.30%), and education services (19.24%). Manufacturing employs 10.97 percent of the total gainful workers, over three-fourths of whom are in the manufacture of textile, wearing

#### **GAINFUL OCCUPATION**

Of the total private household population 15 years old and over, 49.52 percent are engaged in gainful occupations.

In two earlier censal years (1970 and 1975), agricultural, animal husbandry and forestry workers, fishermen and hunters comprised the biggest group of gainful workers, with 31.31 percent in 1970 and 30.48 percent in 1975. However, a shift from the agricultural to production-oriented and professional occupations is noted in 1980. Production and related workers, transport equipment operators and laborers gained 3.80 percentage points, from 28.09 percent in 1975 to 31.89 percent in 1980, leaving behind the topmost group of the 70's with only 26.35 percent. Service workers remained third, increasing negligibly from 12.14 percent to 12.16 percent. A minimal decrease of 0.79 percentage point kept sales workers in fourth place. On the other hand, professional, technical and related workers went up from 6.30 percent to 7.46 percent, displacing from fifth place clerical and related workers which incurred a decrease of 0.05 percentage point. Meanwhile, administrative, executive and managerial workers declined from 0.97 percent to 0.62 percent. An increase in the proportion of workers not classifiable by occupation is noted.

A higher proportion of gainful workers (60.79%) is observed in the urban areas, with only 39.21 percent in the rural areas. As expected, the proportion of production and related workers is higher in the urban areas and agricultural workers, in the rural areas.

The following table reflects the distribution of workers by gainful occupation groups in three censal years:

TABLE E — GAINFUL WORKERS 15 YEARS OLD AND OVER BY MAJOR OCCUPATION GROUP, CAVITE: 1970, 1975 and 1980

Major	19	980	19	75	19	70
Occupation Group	Number	Percent	Number	Percent	Number	Percent
Total	231,239	100.00	<u>179,040</u>	100.00	152,494	100.00
Professional, technical and related workers	17,251	7.46	11,297	6,30	12,883	8.45
Administrative, executive and managerial workers	1,427	0.62	1,733	0.97	1,165	0.76
Clerical and related workers	15,241	6.59	11,884	6.64	8,436	5.53
Sales workers	22,982	9.94	19,211	10.73	14,869	9.74
Service workers	28,108	12.16	21,743	12.14	14,591	9.57
Agricultural, animal husbandry and forestry workers, fishermen and hunters	60,933	26.35	54,565	30.48	47,738	31.31
Production and related workers, transport equipment operators and laborers	73,754	31.89	50,286	28.09	47,529	31.17
Workers not classifiable by occupation	11,543	4.99	8,321	4.65	5,292	3.47

#### **LITERACY**

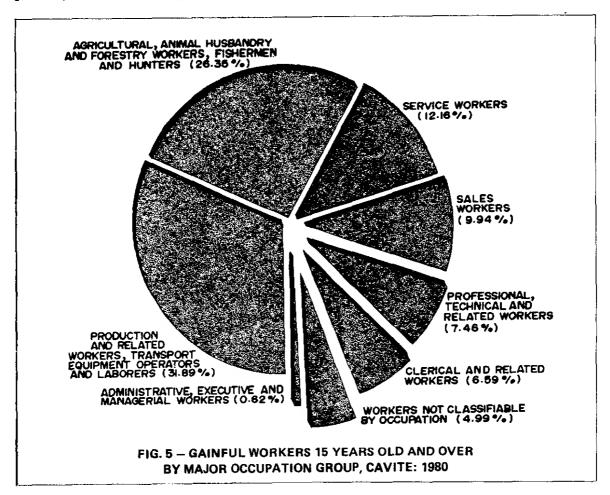

The literacy rate for the private household population 10 years old and over was recorded at 89.63 percent. Taking into account the accessibility of more schools and high urbanization rate of the province, the urban areas had a higher literacy rate (92.69%) than the rural areas (84.95%).

The males generally outnumbered the females in literacy rate – 90.48 percent against 88.82 percent. The literacy rate for male urban residents surpassed that for the females, 93.51 percent for the former and 91.92 percent for the latter. A similar trend was noted in the rural areas where the males registered 85.96 percent literates and the females, 83.94 percent. (See Figure 4).

#### LANGUAGE OR DIALECT

Tagalog remains the most widely used dialect in the province. In 4 municipalities — Alfonso, Amadeo, General Emilio Aguinaldo (Bailen) and Mendez Nuñez, no other dialect was reported except Tagalog.

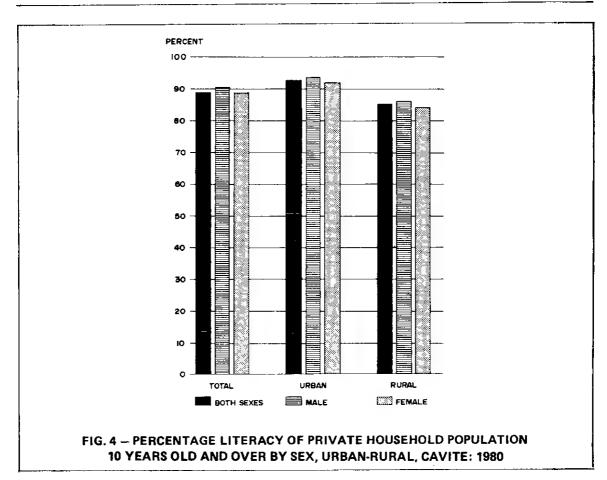

Nearly all (98.09%) of the 138,435 private households in Cavite speak Tagalog. In both the urban and rural areas Tagalog is generally spoken — 97.29 percent and 99.29 percent, respectively. Caviteño is spoken by only 0.53 percent; Lineyte-Samarnon (Waray), 0.36 percent; Chavacano, 0.25 percent; Bicol, 0.20 percent and Ilocano, 0.14 percent.

50.69 percent of those who reached the secondary level completed only the lower years, while 49.31 percent went through the fourth year. Over four-fifths (83.01%) of the college undergraduates finished the lower years (1st - 3rd year); only 16.99 percent completed the fourth or higher year.

TABLE D — PRIVATE HOUSEHOLD POPULATION 7 YEARS OLD AND OVER BY HIGHEST GRADE COMPLETED, CAVITE: 1975 AND 1980

	19	980	19	75
Highest Grade Completed	Number	Percent	Number	Percent
Total	616,307	100.00	<u>511,168</u>	100.00
No grade completed	29,677	4.82	33,671	,6,59
Elementary	317,026	51.44	283,925	55.54
High school	182,812	29.66	130,659	25.56
College	51,360	8.33	30,206	5.91
Academic degree holder	33,463	5,43	20,163	3.95
Not stated	1,969	0.32	12,544	2.45

#### HIGHEST GRADE COMPLETED

In spite of a considerable decrease of 4.10 percentage points, persons with elementary education retained their lead over all the other categories (51.44%). Those who reached the secondary and college levels, respectively, gained 4.10 and 2.42 percentage points. Moreover, academic degree holders went up from 3.95 percent to 5.43 percent. Correspondingly, the proportion of persons who had no formal schooling moved down from 6.59 percent in 1975 to 4.82 percent in 1980, although this may be partly accounted for by those who did not disclose their educational status -0.32 percent against 2.45 percent in the previous censal year.

Out of 317,026 elementary schoolers, 35.88 percent graduated from the sixth or seventh grade. Almost one-third (33.18%) finished anywhere from the first to the third grade; 18.29 percent completed fourth grade and 12.65 percent, fifth grade. Approximately

One-half of the rural (50.57%) as well as the urban populace (50.31%) were married. The urban population had a higher proportion of the never married with 44.50 percent compared to their rural counterparts who comprised 43.83 percent.

An estimated 46.85 percent of the male population 10 years old and over were unmarried, lower by 5.64 percentage points than the 1975 proportion. However, the proportion of married males increased from 45.49 percent to 50.59 percent. Consequently, widowed males went up by 0.26 percentage point after decreasing by 0.56 percentage point between 1970 and 1975. Divorced or separated males accounted for 0.57 percent and those with unknown status, 0.04 percent. Out of 285,298 females, 41.71 percent were single, following a 5.62 percentage-point decrease. In contrast, married females rose from 46.29 percent to 50.25 percent. Likewise, the widowed and the divorced or separated, respectively, went up by 1.02 and 0.60 percentage points.

The succeeding table shows the classification of the population 10 years old and over by sex and marital status:

TABLE C - POPULATION 10 YEARS OLD AND OVER BY SEX AND MARITAL STATUS, CAVITE: 1970, 1975 AND 1980

Sex and	19	80	19	75	1970	)
Marital Status	Number	Percent	Number	Percent	Number	Percent
Total	561,686	100.00	461,138	100,00	366,117	100.00
Never married	248,474	44.24	230,022	49,88	178,844	48.85
Married	283,168	50.41	211,630	45,89	167,844	45.84
Widowed	24,359	4.34	16,996	3.69	16,267	4.44
Divorced/separated	5,368	0.95	2,372	0.51	2,665	0.73
Not stated	317	0.06	118	0.03	497	0.14
Male	276,388	100.00	227,794	100,00	177,948	100.00

Widowed	5,391	1.95	3,853	1,69	4,004	2.25
Divorced/separated	1,590	0.57	706	0,31	753	0.42
Not stated	114	0.04	42	0.02	180	0.10
Female	285,298	100.00	233,344	100.00	188,169	100.00
Never married	118,993	41.71	110,447	47.33	88,503	47.03
Married	143,356	50.25	108,012	46.29	85,174	45.26
Widowed	18,968	6.65	13,143	5.63	12,263	6.52
Divorced/separated	3,778	1.32	1,666	0.72	1,912	1.02
Not stated	203	0.07	76	0.03	317	0.17

apparel and leather (40.63%); food, beverages and tobacco (18.67%) and fabricated metal products, machinery and equipment (15.48%). Transportation, storage and communication contribute 10.52 percent; construction, 9.80 percent; wholesale and retail trade, 9.55 percent and financing, insurance, real estate and business services, 3.66 percent. Electricity, gas and water and mining and quarrying share only a small portion of employment, making up 0.84 percent and 0.55 percent, respectively. Activities not adequately defined constitute 0.77 percent.

#### **MIGRATION**

Of the 654,113 private household persons aged 5 years and over, 89.80 percent resided in the same city/municipality where they had lived on May 1, 1975. Out of 66,694 persons who had a different place of residence on May 1, 1975, 16.66 percent were residents of another city/municipality within the province and 80.56 percent, of another province. Only a small percentage were residents of foreign countries (2.78%). In these three migratory movements, females exceeded males — larger by 3.92 percentage points among migrants from other municipalities within the province, about 1.64 percentage points among migrants from other provinces and by 13.68 percentage points among former residents of foreign lands. Moreover, in the three migratory movements, majority migrated to urban areas.

#### TYPE OF BUILDING

Nearly all (91.81%) of the 138,435 households of Cavite occupy single houses. The rest dwell in duplexes (2.85%), apartments/accesorias/condominiums/row houses (2.31%), improvised structures such as barong-barong (2.62%), commercial/industrial/agricultural buildings (0.36%) and other housing units and collective living quarters (0.05%).

Most of the households in single houses are from the urban areas (58.09%) and 41.91 percent from the rural areas. A greater proportion of households living in duplex structures (80.65%) are likewise found in urban areas and less than one-fifth, or 19.35 percent, in rural areas. Similarly, the number of households occupying apartments/accesorias/condominiums/row houses (95.74%) is much higher in the urban than in the rural areas (4.26%). More than two-thirds (67.58%) of the occupants of improvised structures are likewise located in the urban areas with only 32.42 percent in the rural areas. Majority (87.75%) of the 498 households dwelling in commercial/industrial/agricultural buildings are found in the urban areas, compared to only 12.25 percent in rural areas. More than half (51.72%) of the households living in other housing units (natural shelter, boat, etc.) are found in the urban areas, with 48.28 percent in rural areas.

One-half or 50.00 percent of the households in institutional buildings such as hospital, convent, school dormitory, etc. are rural-based, and the other half in urban areas. In addition, hotels, lodging houses, dormitories and the like are entirely located in the rural areas.

Great changes are noted in the housing conditions in Cavite over the past ten years. Households occupying single houses moved up from 90.89 percent in 1970 to 91.81 percent in 1980. Correspondingly, occupants of duplexes as well as apartments/accesorias/condominiums/row houses gained by 1.26 and 0.41 percentage points, respectively. More structures such as hotels, lodging houses, dormitories and other collective living quarters have likewise been erected which contribute to the advancement and modernization of the province. However, with the increase in proportion of households occupying single houses, improvised structure occupants declined from 4.86 percent in 1970 to 2.62 percent.

The comparative table that follows presents a picture of the housing conditions in Cavite in two censal years:

TABLE F -- NUMBER OF HOUSEHOLDS IN OCCUPIED DWELLING UNITS BY TYPE OF BUILDING, CAVITE: 1970 AND 1980

	19	980	19	70
Type of building –	Number	Percent	Number	Percent

tory, etc.	10	10.0		_
Institutional (hospital, con-			_	
vent, school dormitory, etc.)	10	0.01	8	0.01
Other collective living quarters (military camp, etc.)	10	0.01		

#### TYPE OF OCCUPANCY

Table 1 shows that 82.45 percent of the total households are owners of the dwelling units they occupy. The rest are either tenants or lessees (11.26%), subtenants or sublessees (0.58%), or rent-free occupants (5.71%).

## CONSTRUCTION MATERIALS OF ROOF AND OUTER WALLS

Approximately 80.74 percent of the households in the province are occupying units built with roofs of strong materials (galvanized iron or aluminum, tile/concrete/brick/stone and asbestos). Only 19.26 percent have roofs of light materials (cogon/nipa, makeshift/salvaged materials and others such as anahaw, etc.). Most of the urban (83.40%) and rural (76.74%) households use strong materials for their roofing, whereas users of light materials constitute only 16.60 percent and 23.26 percent, respectively.

As seen in Table 2, more than three-fourths (79.48%) of the households are in dwelling units constructed with outer walls of strong materials (galvanized iron/aluminum, tile/concrete/brick/stone, wood/plywood, mixed tile/concrete/brick/stone and wood/plywood and asbestos) and 20.52 percent, of light materials (bamboo/sawali, cogon/nipa, makeshift/salvaged materials and others such as anahaw, etc.). Majority of the households in urban areas are in dwelling units built with walls of strong materials (86.14%); only 13.86 percent are in units constructed with walls of light materials. Similarly, a higher proportion of the rural households occupy dwelling units walled with strong materials (69.52%) and 30.48 percent, of light materials.

#### YEAR BUILT

An estimated 32.77 percent of the total households occupy structures built in 1976-1980; 24.25 percent, in 1971-1975; more than one-fifth  $(2\overline{2}.9\overline{5}\%)$ , during 1961-1970; 10.83 percent, in 1951-1960 and 4.57 percent, 1942-1950. Households in dwelling units built before the Second World War comprise only 4.63 percent.

#### FLOOR AREA OF DWELLING UNIT

Over one-third (37.74%) of the total households in Cavite live in dwelling units with floor area of less than 30 square meters. Approximately 31.63 percent live in 30-49 squaremeter dwelling units; 12.49 percent occupy units 50-69 square meters and 8.25 percent, 70-99 square meters. Only 9.89 percent of the total households enjoy living in dwelling units with an area of 100 square meters and over.

#### TENURE OF OWNER-OCCUPANT WITH RESPECT TO THE LAND

Of the 114,142 households that own their dwelling units, 65.99 percent also own the land where the structure is erected. The rest of the owner-occupants are distributed as follows: 17.98 percent, lessee or sublessee; 3.16 percent, farm lessee or agricultural tenant of landowner; 3.45 percent, other legal tenure and 9.42 percent, no tenure such as squatter, etc.

#### SOURCE AND USE OF WATER SUPPLY

Two main sources of Cavite's water supply are the faucet, community water system and the tubed or piped deep well. Of the 138,435 households, 49.79 percent rely on the former source for their drinking water; 48.49 percent, for kitchen use and 45.43 percent, for washing clothes. The corresponding figures for the latter are 33.12 percent, 33.77 percent, and 29.77 percent. Tubed or piped shallow wells provide water for drinking to 8.16 percent; for kitchen use, 8.01 percent and for laundering clothes, 7.61 percent. A small proportion of households use water from the dug well and spring for drinking (2.99% and 4.97%, respectively), for kitchen use (3.88% and 4.26%), and for laundering clothes (2.74% and 2.26%). Only a few households depend on lake, river, stream, etc. for drinking water (0.70%) and for kitchen use (0.95%) while 11.45 percent utilize these sources for laundry purposes. Rain, the least used source, is utilized by only 0.27, 0.64 and 0.74 percent, respectively, of the total households.

#### KIND OF LIGHTING FACILITIES

Electricity, the most common type of lighting facility in the province, is used by 67.80 percent of the total number of households, or an increase of 13.86 percentage points over the 1970 proportion. Correspondingly, users of kerosene dropped sharply from 45.66 percent in 1970 to 30.61 percent in 1980. A few households (1.33%) use liquefied petroleum gas (LPG) while users of oil and other types comprise only 0.10 percent and 0.16 percent, respectively.

In spite of a 2.79 percentage-point decline over the 1970 figure, 78.33 percent of the urban households still use electricity. A little over one-fifth (20.72%) use kerosene, compared to 18.46 percent in 1970. LPG is used by 0.71 percent; oil, 0.07 percent and other types, 0.17 percent. Comparatively, the proportion of rural households using electricity (52.03%) increased by 25.00 percentage points, resulting in a corresponding decrease of 27.17 percentage points for users of kerosene (45.42%). About 2.27 percent of the rural households use liquefied petroleum gas; 0.14 percent, oil and another 0.14 percent, other types (Table 5).

#### **COOKING FUEL**

Despite a sharp decrease of 10.21 percentage points, wood or charcoal (45.56%) is still predominantly used in Cavite. While the proportion of households using kerosene (21.54%) dropped by 2.00 percentage points, that of liquefied petroleum gas users moved up from 14.91 percent in 1970 to 26.26 percent in 1980. Meanwhile, the proportion of households using electricity slightly increased from 5.07 percent to 5.18 percent and that of households using other types of cooking fuel, from 0.71 percent to 1.46 percent.

Changes in the proportions of urban and rural households using wood or charcoal, kerosene, and LPG, have slightly altered the pattern observed in 1970. The use of wood or charcoal still predominates in rural areas with nearly three-fourths, or 74.47 percent of the total households compared to 80.41 percent in 1970. Among urban households, however, only 26.25 percent use wood or charcoal, a decrease of 4.64 percentage points from the previous proportion. More than one-third, or 35.20 percent cook with LPG and 30.09 percent, kerosene, reversing the trend recorded in 1970, with 23.79 percent for the former and 35.35 percent for the latter. The rest use electricity (7.21%) and other types of cooking fuel (1.25%). Rural households using liquefied petroleum gas comprise 12.88 percent; kerosene, 8.73 percent; electricity, 2.15 percent; and other types, 1.77 percent. It is interesting to note that in both areas the proportion of households using LPG has considerably increased over a span of 10 years. On the other hand, users of electricity decreased in urban areas but increased in rural areas (Table 8).

#### TOILET FACILITIES

Almost forty percent (39.90%) of the households in Cavite use the water-sealed with sewer or septic tank toilet; 17.25 percent use the water-sealed with other depository; 11.47 percent, closed pit (antipolo, etc.); 7.47 percent, open pit and 2.36 percent, other types such as pail system, etc. Over one-fifth or 21.55 percent of the total households are still without toilet facilities.

As may be expected, urban households have better toilet facilities than their rural counterparts. Approximately 51.55 percent of the urban households use the water-sealed with sewer or septic tank; 16.54 percent, water-sealed with other depository; 8.83 percent, closed pit; 2.27 percent, open pit and 4.30 percent, other types. Meanwhile, 22.46 percent of the rural households use the water sealed with sewer or septic tank facility; 18.32 percent, water-sealed with other depository; 15.42 percent, closed pit; 12.20 percent, open pit and 2.50 percent, other types. Households without toilet facilities constitute 16.51 percent in the urban areas and 29.10 percent in the rural areas (Table 7).

### OWNERSHIP OF RADIO, TELEVISION SET AND REFRIGERATOR/FREEZER

Nearly three-fourths (73.40%) of the households in Cavite have radios; 37.67 percent own television sets and 26.09 percent, refrigerators or freezers. Households owning these appliances made up 65.76 percent, 16.99 percent, and 12.23 percent, respectively, in 1970.

Out of 82,993 urban households, 75.66 percent have radios; 45.28 percent, television sets and 33.95 percent, refrigerators or freezers. Among the rural households, 70.10 percent have radios; 26.32 percent, television sets and 14.36 percent, refrigerators or freezers (Table 9). Between 1970 and 1980 the proportion of households with radios increased by 4.52 percentage points in urban areas and 9.67 percentage points in rural areas; with televisions sets, 17.01 and 20.49 percentage points in the respective areas and with refrigerators or freezers, 12.87 and 10.90 percentage points, respectively.

Government and Community Development (MLGCD); the Commission on Population (POPCOM); National Economic and Development Authority (NEDA); and two representatives from the National Census and Statistics Office (NCSO). The Technical Working Group (TWG) for the 1980 Census of Population and Housing was headed by the Chief of the National Census and Household Surveys Department of NCSO and the members were representatives from the MHS, EPRS-NEDA, SCO-NEDA, POPCOM, UPPI, MOH, MEC, and the National Housing Authority (NHA).

Recommendations were likewise solicited from other government agencies for questions that should possibly be included in the population and housing portions in order to fill their data needs.

As early as August 1977, an NCSO Technical Committee for censuses was created. Ranking officials of the National Census and Statistics Office comprised the committee, with the Assistant Executive Director as Chairman, the Chief of the National Census and Household Surveys Department (NCHSD) as Vice-Chairman and Heads of six other departments and staff offices as members.

The committee coordinated with the Inter-Agency Committee and TWG of the NEDA on the technical aspect of the census and rendered a monthly progress report to the Executive Director. It provided the overall direction of the activities of the different subcommittees on census. The two subcommittees created, the Sub-Committee on Population and Housing Census and the Sub-Committee on Operations and Logistics Support, were directly charged with the preparatory work for the census undertaking.

#### **CENSUS BOARDS**

A systematized involvement of government agencies and instrumentalities was made possible largely through the concerted efforts of the members of the National Census Coordinating Board (NCCB) and the Provincial, City and Municipal Census Boards. The national board was created by NEDA Memorandum Order No. 4-80, dated April, 1980 and the local boards, by Memo Order No. 5-80, dated April 1, 1980, by virtue of the powers vested in the Minister of Economic Planning under Section 3 of Presidential Decree No. 1200.

The NCCB was headed by the Minister of Economic Planning as Chairman with the Executive Director as Executive Officer. Named as members were the Ministers of Agriculture, Budget, Education and Culture, Finance, Human Settlements, Public Works, Justice, Labor, Local Government and Community Development, National Defense, Natural Resources, Public Highways, Public Information and Transportation and Communication. Rules and regulations necessary for the successful undertaking of the census were issued by the Board.

At the local government level, similar functions were carried out by the Provincial City and Municipal Census Boards. The Provincial Governor headed the Provincial Census Board while the Division Superintendent of Schools was Vice-chairman. Members were the Highway District Engineer, Provincial Auditor, Provincial Commander of the Philippine Constabulary, the Provincial Development Officer and the Provincial Agriculturist. The City Census Board was composed of the City Mayor as Chairman; City Superintendent of Schools, Vice-chairman; and the City Engineer, City Assessor and City Development Officer, members. Finally, the Municipal Census Board had for its Chairman the Municipal Mayor and ably assisted by the District Supervisor as Vice-chairman. The members were the Municipal Agriculturist, Station Commander, Municipal Treasurer and the Municipal Development Officer.

## **Explanatory Text**

#### **GENERAL**

#### INTRODUCTION

The National Census and Statistics Office conducted in May 1980, the 1980 Census of Population and Housing. This type of Census was also undertaken in May 1970. In May 1975 the Census of Population was taken as Phase I of the 1975 Integrated Census of the Population and Its Economic Activities. This nationwide undertaking was designed to obtain comprehensive data on the size, distribution, structure, change and socio-economic characteristics of the population and to take inventory of the housing accommodations, their geographic location, structural characteristics, available facilities, etc.

The population report contains data gathered from private households as well as collective households, while data on housing were collected from private households only.

It should be emphasized at this point that a complete enumeration of all households throughout the country was made but only sample household questionnaires representing 20 percent of the listed households were processed and the data published in this volume. In so doing, however, the total population count by barangay, male and female, obtained from the listing sheet taken simultaneously during the enumeration was maintained in computing the weights or expansion factors. It should also be noted that data on Tables 1 to 4 of the population tables refer to total population, that is, the population of the private households plus the collective households while Tables 5 to 10 cover exclusively the private household population.

Pursuant to the provision of Batas Pambansa Bilang 72, a final count of the population, by sex at barangay level was submitted to the President and was approved under Proclamation No. 2170 dated March 12, 1982. This report was published separately in 74 provincial volumes.

#### **AUTHORITY FOR THE 1980 CENSUS**

Under Commonwealth Act No. 591, the National Census and Statistics Office is authorized "to prepare for and undertake all censuses of population, agriculture, industry and commerce."

It may be mentioned in this regard that sometime in February 1980 Parliamentary Bill No. 809 was presented at the Batasang Pambansa, providing for the taking of an integrated census every ten years beginning 1980, with May 1 of every gensal year as the reference date. This bill was approved into Batas Pambansa Bilang 72 on June 11, 1980, more than one month after the start of enumeration.

#### INTER-AGENCY PARTICIPATION

The expertise and technical advice of the National Economic and Development Authority Inter-Agency Committee on Population and Vital Statistics and its Technical Working Group on 1980 Census of Population and Housing played a vital role in the successful undertaking of the census.

The Committee's main function was to review the questionnaire, methodologies, concept, tabulation and other related aspects of the census in the production of data and development of systems that would produce more reliable and accurate result. It had for its chairman the Dean of the University of the Philippines Population Institute (UPPI) and for its members, one representative each from the Ministries of Human Settlements (MHS), National Defense (MND), Education and Culture (MEC), Health (MOH) and Local

For each of these local census boards, the Provincial Census Officer, City Census Officer and the Municipal Census Officer were designated Executive Officer of their respective Board.

#### **CENSUS ORGANIZATION**

The overall direction and instructions for the census undertaking emanated from the Executive Director of the National Census and Statistics Office or in his absence, the Assistant Executive Director.

Assisted by the Task Force from the Central Office and in coordination with the local census boards, the Regional Census Officers and the Provincial Census Officers directly supervised the field operations in their respective areas. The services of District Supervisors, Head Teachers and elementary school teachers from public schools were utilized as City/Municipal Census Supervisors, Team Supervisors and Enumerators in that order.

During the field operations, the 1980 Census Operations Center under the overall supervision of the National Census and Household Surveys Department Chief, was the operating body that monitored the overall operations. Lending support to the center were the Administrative and Fiscal Services Staff.

#### METHOD OF ENUMERATION AND USE OF SAMPLING

The household was used as the enumeration unit and a complete listing of dwelling units, including vacant ones, was done.

A combination of complete enumeration and sampling was adopted. While all households were asked on the count of the population and housing characteristics, only twenty percent (20%) were asked on other characteristics. The selection of sample households was done systematically with a random start from a listing of households which was prepared simultaneously with the enumeration.

Using PH Form 2 (Common Private Household Questionnaire) and with an 80 percent coverage, the items asked on population were household membership, relationship to head, line number of mother, sex, date of birth, age as of last birthday and marital status. For the housing items, the type of building and the construction materials of roof and outer walls, number of rooms, floor area of the dwelling unit and the year the building was built were asked.

In addition to the population and housing items just mentioned, additional information were asked using PH Form 3 (Sample Private Household Questionnaire) from the 20 percent samples such as language or dialect generally spoken at home, citizenship, usual residence of mother at person's birth, residence of person in 1975, ability to speak Pilipino and English, school attendance, highest grade completed, literacy, economic activity of the person, place of schooling or work, fertility, nature of occupancy of the dwelling unit and housing facilities and conveniences.

Collective households were enumerated using PH Form 4, where the information asked were the same as those in PH Form 2, excluding housing items.

#### PLACE WHERE ENUMERATED

All persons were enumerated in their usual place of residence, which is the geographic place (street, barangay, sitio, municipality or province) where the enumerated person usually resides. As a rule, it is the place where he usually sleeps; therefore, it may be the same as or different from the place where he was found at the time of the census.

#### POST ENUMERATION SURVEY

Originally the plan was to conduct a Post Enumeration Survey covering the whole country. For lack of funds the survey had to be confined to Metro Manila. Its purpose was to determine the extent of underenumeration or overenumeration in the 1980 Census of Population and Housing.

A sample of 132 barangays was selected. However, in 59 barangays which were divided into two or more enumeration areas (EAs), an enumeration area was chosen as sample.

A complete listing was made of households in the sample barangays/EAs using PH Form 1-B. Twenty percent of these households were selected as sample households and interviewed using PH Form 2, which was the same questionnaire used for non-sample households during the main enumeration. The housing portion of this form was disregarded.

#### CONTENT AND COVERAGE OF THE PUBLICATION

In this publication, the population and households were described according to the respective items listed below:

Population Items	Housing Items
Age	Type of Building
Sex	Type of Occupancy
Marital Status	Construction Materials of Roof and Outer Walls
Highest Grade Completed	Year Built
Literacy	Floor Area of Dwelling Unit
Language/Dialect Spoken in the Household	Tenure of Owner-Occupant with Respect to the Land
Gainful and Non-Gainful Occupation	Kind of Lighting Facilities
Major and Minor Industry	Use and Source of Water Supply
Migration	Type of Toilet Facilities
•	Kind of Cooking Fuel
	Household Appliances

The above items are presented in the ten population tables and nine housing tables of this report.

Except for figures on total population and sex, all other characteristics were based on a 20 percent sample.

Aside from these published tables, 10 other tables on the above characteristics plus 6 statistical tables dealing on ever-married women 15 years old and over are also available to statistical users.

#### **DEFINITION OF TERMS AND CONCEPTS**

#### I - POPULATION

#### **BARANGAY**

A barangay is the smallest political unit in the country and generally its enumeration is

assigned to one enumerator. For enumeration purposes, a large barangay is usually split into parts and each part is called an enumeration area (EA).

#### ENUMERATION AREA

An enumeration area (EA) is a delineated area assigned to one enumerator, usually consisting of about 300 households. A barangay or part of a barangay may have been designated as an enumeration area.

#### URBAN AND RURAL AREAS

The same concepts used in the 1970 and the 1975 Censuses were followed in classifying areas as urban. According to these concepts, urbanized areas consist of:

- 1. In their entirety, all cities and municipalities having a population density of at least 1,000 persons per square kilometer.
- 2. Poblaciones or central districts of municipalities and cities which have a population density of at least 500 persons per square kilometer.
- 3. Poblaciones or central districts (not included in 1 and 2), regardless of the population size, which have the following:
  - a. Street pattern, i.e., network of streets in either parallel or right-angle orientation;
  - b. At least six establishments (commercial, manufacturing, recreational and/or personal services); and
  - c. At least three of the following:
    - 1) A town hall, church or chapel with religious services at least once a month:
    - 2) A public plaza, park or cemetery;
    - 3) A market place or building where trading activities are carried on at least once a week;
    - 4) A public building like a school, hospital, puericulture and health center or library.
- 4. Barangays having at least 1,000 inhabitants which meet the conditions set forth in 3 above, and where the occupation of the inhabitants is predominantly non-farming or fishing.

All areas not falling under any of the above classifications are considered rural.

#### PERSONS ENUMERATED IN A PRIVATE HOUSEHOLD

The following were counted and enumerated as members of the household:

- 1. Persons whose usual place of residence is the place where the household lives and present at the time of visit of the enumerator, except those born after 12:01 A.M., May 1, 1980;
- 2. Persons whose usual residence is the place where the enumerated household lives, but temporarily away at the time of enumeration, such as:
  - a. persons temporarily away on vacation, business or pleasure trip or any other purpose in the Philippines who are expected to be back within six months,

- or within one year, if abroad;
- b. students who usually go home to their respective households at least once a week:
- c. persons working elsewhere who usually go home to their respective households at least once a week;
- d. patients confined in hospitals for not more than six months at the time of enumeration of the household, except those confined (1) as inmates (not patients in wards for temporary confinement) in tuberculosis pavilions; (2) in mental hospitals; (3) in leprosaria or leper colonies; and (4) in rehabilitation centers for drug addicts;
- e. trainees in the Armed Forces of the Philippines, if their training is not more than six months;
- f. convicts and detainees in provincial or municipal/city jails or military camps, who have been confined for not more than 6 months at the time of enumeration of the household, except those who have been sentenced for more than 6 months (including those whose sentence is on appeal), even though just confined; and
- g. officers and crew members of coastal, interisland, or fishing vessels; officers and crew members of ocean-going vessels who usually go home to their household at least once a year.
- 3. Boarders of the household who are working, looking for work or studying, and who do not go home at least once a week;
- 4. Employees of household-operated enterprises who eat and sleep with the household and who do not go home at least once a week;
- 5. Persons (other than those in "3" and "4") whose usual place of residence is elsewhere, but who have been away from their usual place of residence for more than 6 months;
- 6. Members of the Armed Forces of the Philippines including draftees, sleeping most of the nights with the household, except those who only board or lodge with the household and who usually go home at least once a week; in such a case, they will be enumerated in their own household;
- 7. Persons found in the household who have no usual place of residence elsewhere;
- 8. Persons found in the household who are not certain of being enumerated elsewhere;
- 9. Persons who consider the dwelling unit of the household as their usual place of residence but are living within the premises of a foreign embassy, ministry, legation or consulate, including non-Filipino employees who have been residents of the Philippines before such employment;
- 10. Citizens of foreign countries and Filipinos (balikbayan) who have resided or expect to reside in the Philippines for more than one year from arrival;
- 11. Persons who sleep in the same dwelling unit but may not be able to take all or some of their meals with the household because of the nature of their work or other similar reason (they take their meals at place of work, etc.), should be considered as part of the household; and
- 12. A household member who is alive as of 12:01 A.M., May 1, 1980, but dies prior to the enumeration of the household.

#### PERSONS TOTALLY EXCLUDED FROM THE ENUMERATION

Totally excluded from the population count of the Philippines were:

- 1. Foreign ambassadors, ministers, consuls or other diplomatic representatives, and members of their households (except Filipino employees and non-Filipino employees who had been residents of the Philippines prior to said employment);
- 2. Citizens of foreign countries living within the premises of an embassy, legation, chancellory or consulate;
- 3. Officers and enlisted men of U.S. Military or Naval Forces and non-Filipino members of their households, irrespe tive of residence; foreigners who are civilian employees in U.S. military or naval stations and member of their families living within the premises of said stations or reservation; (Note: for foreigners who are civilian employees of said stations living outside the station or reservation, see Item 5).
- 4. Citizens of foreign countries who are Chiefs and officials of international organizations like UN, ILO or USAID, who are subject to reassignment to other countries after their tour of duty in the Philippines, and members of their families;
- 5. Citizens of foreign countries together with non-Filipino members of their families, who are students or who are employed, or have business in the Philippines and have been in the Philippines or expect to stay in the country for one year or less from arrival;
- 6. Citizens of foreign countries and Filipinos with usual place of residence in a foreign country, who are visiting in the Philippines and expect to stay in the country for one year or less from arrival (e.g. a balikbayan who will return to his usual place of residence abroad after a short vacation or visit in the Philippines);
- 7. Citizens of foreign countries in refugee camps/vessels; and
- 8. Residents of the Philippines on vacation, pleasure or business trip, etc. abroad, who have been away or expected to be away from the Philippines for more than one year from departure.

#### USUAL PLACE OF RESIDENCE

The term refers to the geographic place (street, sitio, barrio/barangay, municipality or province) where the enumerated person usually resides. As a rule, it is the place where he sleeps most of the time; hence, it may be the same as or different from the place where he was found at the time of the census.

#### HOUSEHOLD

A household usually consists of a group of persons who sleep in the same dwelling unit and have common arrangements for the preparation and consumption of food. A person who lives alone is considered as one separate household. Although in most cases a household consists of a related family group, some household members may have no relationship to the central group. Boarders and servants, for instance are counted as part of a particular household if they take their meals with the household and sleep in the same dwelling unit. Persons who sleep with a household but individually cook their meals or eat elsewhere are each considered as single-person household.

Three generations may be living in one dwelling unit. If they are divided into two or more groups whose eating arrangements are independent from each other, each group is counted as a separate household.

#### PERSONS NOT LIVING IN HOUSEHOLD

Falling under this category are persons living in collective living quarters such as welfare institutions (orphanages and homes for the aged or infirm); penal and corrective institutions (jails, national penitentiary, and reformatory institutions); hospitals, sanatoria, leprosaria, and nurses homes; dormitories and boarding schools; lodging houses such as hotels, tourist homes and the like; military camps and others.

Most of these institutions house inmates for whom care or custody is provided by resident staff members, or persons residing in group quarters or in housing units on the institutional grounds.

Private families living within such institutions, however, are excluded from the classification, as well as persons (employees, students, etc.) who go home to their families on weekends or days off. Persons found in lodging houses, but who are on vacation or business trips and whose absence from home does not exceed six months on the day of enumeration, are likewise not counted as part of the institutional population.

#### RESPONDENT

A respondent is any responsible adult member of the household who furnished the information or answers to questions during the interview.

## LANGUAGE/DIALECT GENERALLY SPOKEN IN THE HOUSEHOLD

This refers to the language or dialect spoken most of the time by members of the household. In cases where two or more languages/dialects are spoken by household members, the one most often used in conversations among members of the family of the head when most of them are gathered together is considered as the language/dialect generally spoken in the household.

#### **HEAD OF HOUSEHOLD**

The person responsible for the care and organization of the household is generally considered as the head of the household. He usually provides the chief source of income for the household.

In the case of a household consisting of two or more unrelated persons sharing a dwelling unit and sharing the same cooking facilities and meals, the head is usually the eldest male or female in the group regarded as such by the other members.

### RELATIONSHIP TO HEAD OF HOUSEHOLD

This determines how each household member is related to the head, who is usually the husband or father, although in his absence or if incapacitated, the wife may be designated as head.

- Spouse a woman/man married to and living with the head. This includes legal marriages as well as common-law relationships.
- 2. Son/daughter the head's own child, stepchild, or adopted child.

- 3. Son-in-law/daughter-in-law refers to a household member related to the head by marriage to his daughter or son.
- 4. Grandson/granddaughter child of the son or daughter of the head.
- 5. Other relative a household member related to the head by blood, marriage, or adoption. Father, mother, aunts, nephews, parents-in-law and cousins are examples.
- 6. Others any person in the household who is usually a non-relative of the head. Boarders and servants fall under this category. Certain members of the household who are related to the head by blood or affinity, but are actually boarders or servants in the household, are classified under "Others".

For collective households and group quarters, the question on relationship refers to the person's relationship to the institution or establishment, and not to the person recorded as head

#### AGE AND DATE OF BIRTH

Data on the age of the population were obtained by asking the respondent the month and year of birth and the age itself of the household member before May 1, 1980. To ensure accuracy, a conversion table on age before May 1, 1980 was prepared for the use of enumerators, editors/coders and verifiers.

#### MARITAL STATUS

This refers to the civil status of all persons 10 years old and over. A person in this age group is classified as single, married, widowed, separated or divorced, or civil status unknown, based on the following definitions:

- a. Single If never been married.
- b. Married Legally married or living consensually with husband/wife without benefit of a legal marriage. A person classified as "married" includes one who remarried after having been widowed, separated or divorced or one temporarily separated from spouse owing to the nature of work, illness or service in the Armed Forces.
- c. Widowed A person whose spouse died and who has not remarried at the time of enumeration.
- d. Separated —If permanently separated from spouse either legally or otherwise, due to marital discord.
- e. Divorced If bond of matrimony has been dissolved through a court decree and is therefore free to remarry.
- f. Unknown If civil or marital status is either not known to the respondent, or the respondent himself refuses to reveal the marital status of such person.

#### CITIZENSHIP

Citizenship is defined as the legal nationality of a person. A citizen is a legal national of the country of the census; an alien is a non-national of the country.

#### LITERACY

A person is considered literate if he is able to read and write a simple message in any language or dialect.

#### HIGHEST GRADE COMPLETED

This has reference to the specific grade or year completed in elementary school, high school, college or university, by persons 7 years of age and over. Academic degree holders are classified according to the title of the degree received or the major field of study undertaken.

#### USUAL OCCUPATION

This refers to the specific job or kind of work that a person, who works most of the year, is usually pursuing, or if unemployed at the time of enumeration, it is the kind of work he used to do most of the year. A person is considered as usually working most of the year if he works for at least 10 hours a week for 26 weeks either for pay in cash or in kind, for a fee or profit in own farm, business or establishment or practice of a profession and without pay on family farm or enterprise. This particular group of workers is referred to as gainful workers.

For persons who do not work most of the year, the usual occupation relates to the non-gainful activities they usually do most of the year. Among such persons are housekeepers, students, pensioners, retired and disabled. However, a person who is housekeeping or schooling and also works in a gainful activity was reported as gainfully employed, even if more time was spent housekeeping or studying, as the case may be.

#### **INDUSTRY**

Industry refers to the specific character and nature of business or industry or the place where the work is being performed in connection with the job or occupation reported for a person.

#### **EVER-MARRIED WOMAN**

This refers to a woman who has already entered married life. Marriage here may either be legal or consensual union. At the time of enumeration the ever-married woman may still be married, or already widowed, separated or divorced.

#### II - HOUSING

#### BUILDING

A building is any independent free-standing structure comprising one or more rooms or other spaces, covered by a roof and enclosed within external walls or dividing walls with adjacent building which usually extend from the foundation to the roof. It usually contains one or more rooms internally connected with one another. A building therefore, is any structure intended for dwelling, storage, factory, shelter or for some other useful purposes.

For purposes of the 1980 Census of Population and Housing, only the following buildings were listed and assigned building serial numbers:

- a. A house or any kind of building or shelter where people were actually living;
- b. A residential building (house, apartment or accesoria, condominium) that was vacant;

- c. Hotel, motel, lodging house, dormitory or camp (construction, logging, mining, etc.) in operation;
- d. A commercial, office, industrial, agricultural or other kinds of buildings with one or more dwelling units (containing a kitchen/kitchen-dining room, living room and a bedroom, and with separate entrance) which were all vacant.

### The different types of buildings are:

- 1. Single house a complete structure intended for one household. It includes the so-called "nipa hut" or a small house that is built as a more or less permanent dwelling unit.
- 2. Duplex a structure intended for two households, with complete living facilities for each. It is divided either vertically or horizontally into two separate dwelling units which are usually identical.
- 3. Apartment/accesoria/condominium/row house

An apartment is a structure usually of several stories, made up of three or more independent entrances from internal halls or courts. It differs from an accesoria in that an apartment has one common entrance from the outside.

An accesoria is usually a one or two-floor structure divided into three or more dwelling units, each dwelling unit having its own separate entrance from the outside. Another name for accesoria is row house.

A condominium is usually a high-rise building where the dwelling units are owned individually but the land and other areas and facilities are owned in common.

- 4. Improvised (barong-barong) a makeshift or roughly constructed house usually built with salvaged materials.
- 5. Commercial/industrial/agricultural buildings not intended for human habitation but used as dwelling units at the time of the census.

Commercial – a building used for transacting business or rendering professional services, such as a storage or an office building.

Industrial – a building used for processing, assembling, fabricating, finishing, manufacturing or packaging operations, such as a factory or a plant.

Agricultural — any structure used for agricultural purposes, such as a barn, warehouse, rice mill, etc.

6. Other housing unit (natural shelter, boat, etc.)

This refers to living quarters which are not intended for human habitation nor located in permanent buildings but which are, nevertheless, used as living quarters at the time of the census. Caves, other natural shelters and mobile housing units such as trailer, barge, boat, etc., fall within this category.

- 7. Hotel, lodging house, dormitory, etc. This group comprises permanent structures which provide lodging and/or meals on fee basis. Hotels, motels, inns, boarding houses, dormitories, pensions and lodging houses fall within this category.
- 8. Institutional (hospital/convent/school dormitory/penal institution, etc.) a building intended for persons confined to receive medical, charitable, or other care treatment such as jails and penal colonies, and other buildings like convents, school dormitories, etc.
- Other collective living quarters any structure or shelter which does not fall under items 7 and 8. Included in this category are camps which are defined sets of

premises originally intended for the temporary accommodation of persons with common activities or interests like military camps, and other camps established for the housing of workers in mining, agriculture, public works or other types of enterprises.

#### **DWELLING UNIT**

A dwelling unit is a separate and independent place of abode intended for habitation by one household, or one not intended for habitation but occupied as living quarters by a household at the time of the census.

Dwelling units counted included those that are occupied and those that are unoccupied.

#### CONSTRUCTION MATERIALS OF ROOF

The kinds of materials used are as follows:

- 1. Galvanized iron/aluminum
- 2. Tile/concrete/brick/stone
- 3. Asbestos
- 4. Cogon/nipa
- 5. Makeshift/salvaged materials
- 6. Others (anahaw, etc.)

#### **CONSTRUCTION MATERIALS OF OUTER WALLS**

The kinds of materials may be any of the following:

- 1. Galvanized iron/aluminum
- 2. Tile/concrete/brick/stone
- 3. Wood/plywood
- 4. Mixed tile/concrete/brick/stone and wood/plywood
- 5. Asbestos
- 6. Bamboo/sawali
- 7. Cogon/nipa
- 8. Makeshift/salvaged materials
- 9. Others (anahaw, etc.)

If the roof or outer walls are constructed of two or more materials the material most used was reported.

#### YEAR BUILDING WAS BUILT

This refers to the year when the extent of construction permitted occupancy for living purposes. The year reported was the particular year when the occupancy started or when the building was fit for occupancy even if not occupied.

#### NUMBER OF ROOMS IN THE DWELLING UNIT

A room is defined as a space in a dwelling unit or other living quarters enclosed by walls reaching from the floor to the ceiling or roof covering, or at least to a height of 1.8 meters which are of permanent or semi-permanent structure, of a size large enough to hold a bed for an adult or at least has an area of 3 square meters.
